SHULMAN BROS.
WATKINS, N. Y.
At Shulman & Son's Clothing Store.

WATKINS EXPRESS.

THURSDAY, JULY 21, 1904.

Home Matters.

What is done is done; has already blended itself with the household, and will work for good or evil, openly or secretly throughout all time.

Races at Elmira next week.

Joe cream and luncheon will be served in the Methodist church Thursday.

Mrs. Barham has a cement walk in front of her pleasant fifth street home.

The N. C. Ry. water tank at this station has been newly roofed and repaired.

Mr. and Miss Pettit of Avoca have been guests for a while at the Burnham home.

Mrs. Earl H. Burr of Niagara is visiting her parents, Mr. and Mrs. W. E. Berry.

The Gulick residence on Fifth street has been somewhat extensively repaired of late.

Mrs. Gillet is in Boston visiting at the home of her niece, formerly Miss Anna Capell.

Wonder why the lunch owners at this end of Seneca do not organize a yacht club?

The ladies of the Baptist church are serving ice cream, coffee and sandwiches on the lawn to-day.

Remember the County Sunday School Association meeting at Reading Center Wednesday next.

The Morris and Abbey stores and the Fredenburgh store at Valois have new announcements this week.

Frederick Archer of New York city is passing the week in town and at the Archer farm in Monroe.

Raymond Howe and wife will move into a part of the Jones house between Stenben and Monroe streets.

The Orange town board has voted several new iron bridges to replace structures that have become unsafe.

The employees of the Elmira Water, Light and Railroad company will run an excursion to Watkins to-morrow.

The Hoyt mansion and buildings have been repaired, Charles L. Cole having the contract for the work.

There will be a considerable acreage of beans in Schuyler this year planted not far from the middle of July.

During the thunder storm on Friday night Daniel Robbins of Sugar Hill had thirty sheep killed by lightning.

Mr. and Mrs. Robert Pierce of New York city are guests at the home of her parents, Henry Berthoff and wife.

The Rev. Mr. Brown of Reading Center will preach in the Watkins Methodist church next Sabbath morning.

Going to press earlier this week than usual, some correspondence and other matters were unavoidably left over.

The regular prayer meeting of the Baptist church will be held on Friday evening this week instead of Thursday.

Rev. and Mrs. Atkinson will pass the month of August at Chautauque. Mrs. Atkinson is the delegate from this circle.

Miss Jane Hard sang a solo at the Presbyterian morning service Sunday which afforded pleasure to all who heard it.

Dr. and Mrs. George H. King went to New York city yesterday for a visit of a few days with their daughter, Mrs. Dr. Waller.

The Board of Education has received the Comptroller's check for \$369.55 in payment of non-resident tuition at the High School.

Mr. Geo. A. Kisel and Mrs. Jennie Hale, both of Jersey Shore, Pa., were married last Sunday afternoon by Rev. F. V. Atkinson.

The Methodist Sunday school picnic at Eldridge Park Friday was well attended and proved a pleasant outing for young and old.

U. S. Dept. of Agriculture bulletin No. 63, bureau of plant industry investigates various rusts which attack plants—crown rust of oats etc.

Frederick Sherman who is an expert telegrapher is doing sub work along the N. C. Ry., for part of his vacation and will return to Cornell this fall.

The New York National League team plays the Father Mathew base ball team, at Elmira, Monday, July 25th. It will be a game well worth seeing.

Mr. and Mrs. C. M. Woodward have entertained, for a few days recently, Mr. and Mrs. Brownlee of St. Catharines, Canada, cousins of Mrs. Woodward.

A big flow of natural gas has been found at Branchport at a depth of 350 feet. When lighted the flame shot up forty feet and was extinguished only with difficulty.

The novel and attractive window displays in several of our village stores are much admired. The Morris, Barch and Bridgman windows are ingeniously decorated.

William Smith, the wealthy nurseryman of Geneva, has indefinitely postponed if not altogether abandoned his project of erecting and endowing a college for women.

A couple of Hamilton college seniors are spending a vacation month not unpleasantly in this locality canvassing for magazine subscribers. They are prepossessing young men who make friends easily. The home of one of them is San Francisco and his plan for life work is to become a clergyman.

The Lodi landing hotel is open for the season in charge of Mr. and Mrs. William Cox of Ovid, experienced hotel managers, it is said.

A plant has been started in Cortland to make flour from skimmed milk. The industry thrives in Germany and the quality of the flour is said to surpass wheat flour, in nutrition.

An exchange tells of a woman who justifies mild coercion to induce her husband to aid in the dishwashing by quoting II Kings 21:13 with which our readers are possibly familiar.

Mr. and Mrs. Newton Waller think of passing a year or two in Syracuse, while their daughter completes her University course. They advertise their pleasant Madison avenue home to rent.

A recent fine piece of work by Mr. Payne the photographer is a picture of the last High School graduating class, seated on the dais in the chapel. It was taken on Commencement morning evidently.

The Birkett flour mills at Penn Yan will hereafter be conducted as a stock company. The capital stock will be \$150,000, of which \$75,000 has already been paid in. The mills are the oldest in Yates county.

U. S. Dept. of Agriculture bulletins of value are No. 201 which tells of cream separators, and No. 200 which tells all about turkeys, the standard varieties, feeding, handling, management, parasites, diseases etc.

A Franklin feed dealer is of the opinion that the poor showing of corn is the direct result of farmers trying to drive bargains in seed. The planters aim to secure seed corn at low figures, and the result is inevitably poor.

All day Sunday and far into the night a merry-go-round near the depot ground out doleful and depressing sounds, to the great annoyance of residents within hearing distance. Such a thing should not be allowed to happen again.

Orleans county was cyclone swept on Tuesday. Across the town of Yates a hundred foot swath was cut and everything in its way laid low—trees, buildings, telephone poles etc. Torrential rain fell and lightning did much damage.

On the New Road, so called, to Townsend are fifteen residents who wish rural delivery service and think that route No. 1 of Watkins should go to Townsend where they instead of north of the Glen where only two patrons are served.

Messrs. Stauffer and Hardt pleasantly entertained a house party at their lake shore cottage over Sunday. Among those present were Mrs. King, Mrs. Tuttle, Mrs. Mumford, the Misses Beach, Wait and May Durand and Messrs. Clute, Wait and others.

The Presbyterian pulpit will be supplied July 24th by the Rev. G. A. Paul, D. D., of Bloomfield, N. J., and on July 31, by the Rev. Wm. E. Foote of Port Jervis, N. Y. The pastor will return from his vacation the first Sunday in September.

While Mrs. Arthur Stilwell of Covert was blacking a stove with a benzene stove polish, the benzene caught fire and she was seriously injured before the flames could be extinguished, burning most of her hair. It is thought, however, that she will not be permanently injured.

Lewis Beardsley and family spent last week in Olean where relatives reside. Mr. Beardsley likes the town which is growing fast and rich. He says the Presbyterian church and parsonage where Mr. Ruf has been called stand side by side on one of the pleasant streets in the city.

A. F. Chapman & Co., have been awarded a \$100,000 contract for which the material has been bought and work will begin at once. It is the construction of a railway for the United States Government at the Sandy Hook proving grounds, capable of handling the enormously heavy guns that are taken there for testing.

We hear that Rev. W. H. Brooks for the past eight years in charge of the Baptist pastorate at Belleville, N. Y., has tendered his resignation which was received by his church with reluctance and regret. Mr. Brooks is a son of Rev. C. W. Brooks of Watkins and is a gifted and earnest young man of whose further plans we have not learned.

The Lake Kenia Medical & Surgical Association will have their fifth annual meeting at Grove Springs July 28 and 29th, when papers of much interest will be read. The address of the president, Dr. A. L. Beahan of Canandaigua, will be a demonstration of the properties and therapeutic of liquid air, and its use in the treatment of moles, birthmarks etc.

Edward Gleason of Rochester aged twenty-six died the other day as a result, it is said, of icy poisoning. This is the first case brought to our attention where contact with the noxious weed resulted fatally, and perhaps there were contributing causes. The vine should be rooted up, however, wherever found, but we judge it is gaining instead of losing ground in this vicinity.

On Sunday at Putney Landing on the West branch of Lake Kenia, Bert A. Roe of Benton drove into the lake to water his horse. When in about eighteen inches of water the horse began to slide into deeper water. Roe leaped out but the horse and buggy valued at \$200, sank into one of the hidden holes in that part of the lake and have not yet been found by dragging.

The Presbyterian church leaflet of Sunday last says: "The church is to be congratulated that the effort to introduce the envelope system has been successful in providing definitely for the expenses of the church. Last year the congregational expenses amounted to \$2,250, and the amount so far pledged, \$2,000, together with current collections will, it is hoped, be sufficient to meet these fixed charges in the future.

According to an exchange "A builder of very extended experience, notes the fact that a great portion of the houses that are burned catch fire from holes in the chimney just below the roof. These holes are caused by the coal gas eating out the lime in the mortar. Every one knows that chimneys have to be relaid every few years down to the roof. Below the roof the chimneys are too often neglected." This is certainly a good suggestion and deserves some consideration.

The next convention and parade of the C. O. S. Y. S., will be held at Elmira. Canandaigua would have asked for the honor, but when Elmira announced her desire, all the delegations concurred. The association officers next year will all be Chemung men.

U. S. Pension Agent Charles A. Orr, of Buffalo, paid out last Thursday 5,000 checks to pensioners of Western New York and representing over \$600,000 in money. This is practically a government distribution of that much money to the business of this section.

We hear that Mrs. D. F. Benjamin of Boreford, South Dakota, is visiting in Schuyler, some part of the time at the home of her aunt Mrs. Sarah Wilbur. Mrs. Benjamin was formerly Miss Sarah Goltz of this county. Mr. Benjamin is also a pleasantly remembered as a former citizen of Schuyler from whom Express readers now and then hear something concerning Dakota crops etc.

Mr. Truman E. Thompson of Cortland and Miss Mary A. Mills of this village were married at the Baptist church yesterday morning at 11 o'clock, by Rev. F. V. Atkinson, in the presence of a large number of friends and relations. Immediately after the ceremony the newly married couple departed for Cortland where in future they will make their home. Mr. Thompson being employed in the carriage works there.

Robert Dolan a former Watkins boy and son of Mrs. Mary Dolan of our village made his mother a flying visit last week though business permitted him only a few hours' stay. Mr. Dolan has been away from his boyhood home for nearly twenty years now, part of the time in New York city, but is now at Denver, Col., engaged in the manufacture of high grade nearly white brick, by a new, German process. His trip to the East was to buy new machinery for his company.

Seneca county has a woman centenarian in Louise Chauncey, who is 103 years of age. She was born at sea at the beginning of the 19th century, and her age is now equal to that of the late Arizona Fleming who, having reached 103 years, died several years since in South Waterloo. "Auntie" Chauncey never wore glasses and is very spry considering her great length of years. She has been an inmate of the county house for a long time.

The Express related a week or two ago how an aged man by name of McKnight, a stranger in our town, fell and broke his wrist. The item did not add that County Treasurer Whit, who chanced to pass at the moment, directed that the old man be taken to the office of Dr. Barnes, and the bill be sent to the Wait bank. This was the fact, however, and the Montour Falls Free Press adds that "Mr. McKnight is the father of Mrs. E. G. Beadle, who resides on the Lewis place on West hill, and as soon as they learned of the facts Mr. Beadle went to Watkins and paid Dr. Barnes and thanked Mr. Wait for the interest he had taken in the case, to him, a total stranger."

If you have a horse and a locust tree and care about either of them hitch the horse to something else. According to the Canton, Pa. Sentinel, "The Atlantic Refining Company has lost five horses in the vicinity of Williamsport this spring, and for some time the cause of their death was a mystery. After thorough investigation the veterinary decided that the animals were poisoned by gnawing the bark of the locust tree. It is reported that several children have also been poisoned in that region by chewing twigs from these trees. The bark has a sweet taste and not at all unpleasant, but it is very dangerous. The company has issued a general circular to its drivers warning them not to hitch their horses to locust trees or where they can gnaw the bark of that tree."

Pleasant callers at this office yesterday were Mayor William T. Coleman and Charles A. Landy of Elmira, who came to the firemen's convention to secure for their city next year's convention and parade. The mayor and a number of Republican aldermen will parade to day with the Elmira exempts, and we hear gossip to the effect that Democratic aldermen of that city are conspicuous by their absence. It would seem, as the facts come to us, that when the city charter was recently amended the Democratic aldermen were implacably opposed to allowing the exempts any portion of the foreign insurance tax, referring to them somewhat unkindly as "dead ones" not entitled to recognition. The mayor and the 13 Republican aldermen took a different position, however, and the exempts at their annual meeting made all 14 of them honorary members of the association.

The family of Hawes, or Hanes as it is quite as often spelled, is one of the few in our county which have a matter of record genealogy extending far back in the centuries. Through the efforts of Alfred B. Hanes of Ovid and Dr. James P. Hawes of Valois the family line has been carried back to 1690 when the John Hanes to whom they trace was an infant born in Germany and cousin of Queen Mary II of Great Britain. In 1715 this John Hanes married, in New York city Sarah Allen, and from that union the present Hanes are descended. All down the generations the families have been large—not unusually twelve or fourteen children, and as a consequence the Hanes have multiplied on the face of the earth. They seem to have been all upright and God-fearing people and Dr. Hawes laughingly remarked that the most creditable affair he found hanging on the family tree was one element. The Doctor has had the genealogy of the Western New York branch put in print for distribution among his kinsfolk of the name.

German Milking Device. Consular Agent Warner, at Gera, Germany, describes an electrical milking device used to advantage in that country. Rubber hoses are attached to the udder of the cow, the hoses are connected with a vessel for receiving the milk by means of a rubber tube, from which the air is exhausted by means of the electrical device. It is claimed that the suction, thus secured, resembles very closely the sucking of a calf, and that for this reason, the cows let down their milk more freely than when milked by hand. It is also claimed that absolute cleanliness of the milk may be secured when this method of milking is employed.

William L. Underwood, a lecturer in the Massachusetts Institute of Technology, has been following with microscope and photographic plate the trail of the house fly and his discoveries are startling not to say alarming. As they pass over food countless numbers of germs, too small to be seen save by the aid of a microscope, are planted. Twelve hours later, the dishes containing the food having been kept in a warm place, the groups of bacteria could easily be seen with the naked eye. During this time the germs had multiplied many thousands times. At each place where the fly's feet or tongue touched, a living colony, or, rather, a city of germs was found. The population of a single colony was counted and found to contain 40,000,000 germs. They had, of course, multiplied many times after they were planted on the jelly by the fly's tongue.

Scientists have before told us that the house fly carries with it no end of germs that may do the human being lots of harm, but forty-six million germs per fly track is a startling discovery. Prof. Underwood has created a new incentive for the use of the fly sparker, and the housewife will find herself in a new campaign against the great American household nuisance.

At Sugar Hill. There will be an ice-cream social Saturday evening, July 23d, at the home of J. L. Buck for the benefit of the Sugar Hill Presbyterian church. All are cordially invited.

A New Potato Pest. The cause for the blight which swept over the potato crop in this section a week ago has been successfully solved by J. W. Truax. Mr. Truax works the Conover farm and for days past witnessed the destruction of his thriving potato crop. The stalks and leaves began to wilt and Mr. Truax was at a loss to account for such an affection. After a careful examination of the stalks he discovered that small worms had concealed themselves on the inside of the stalk and were sapping away the life of the vine.

The pests make very rapid inroads and eat away the heart of the stalk causing it to wilt and topple over. The Leader would be glad to hear from any farmers who have met with a similar experience, especially if any one has discovered a remedy.—Cornell Leader.

Weather Notes for June. Highest temperature 85°; on 25th; lowest temperature 40°; on 12th; mean, 64.3°; normal, 62.6°; departure, 1.8° above; warmest days 5th and 26th, mean temperature 74°; coldest day 10th, mean temperature 55°; rainfall 3.39 inches; normal 4.90 inches; departure 1.51 below; greatest in 24 hours 1.39 inches, on 9th. There were 13 days with .01 inch or more rainfall, normal 16. There were 13 clear, 11 partly cloudy and 8 cloudy days; average 12, 13, 5. Sunshine 57.3 per cent, normal 60 per cent. Prevailing wind S.W., which is usual. Thunderstorms on 4, 8, 9, 14, 15, 20, 21, 30. H. S. Howard, S.E. Reading, reports 2.18 inches rainfall; Dewitt Creek, S.E. Dix, 8.12 inches. Only .38 inch fell in the 20 days—10th to 29th, both inclusive.

Crop Prospects. The crop bulletin says: There will be a good yield of hay of good quality. Corn is backward, but it is growing rapidly and is much improved. Potatoes are very promising, and oats and barley are fine; good heading is reported. The wheat and rye yield is very light. Beans, buckwheat, hops, tobacco, and sugar beets are making rapid progress. Apples and pears will be light, peaches very light, and grapes below the average.

Schuyler.—Haying progressing slowly; oats, barley, and potatoes promising; corn growing slowly; buckwheat all sown.

Wedge, N. Y. O. F. CORVIX.

Piping the Village.

George G. Reynolds, Esq., of the Consumers' Natural Gas Company, appeared in town yesterday morning at the head of an Italian brigade, forty-four in number, brought here to pipe the gas from the Hill well through the village. The men constitute the Chemung County Gas Co.'s ditching gang, and have dug forty miles of trench in Elmira at large. Tomorrow the other gang, called the "piping gang," will be on hand in strong force, for the work is to be rushed. The gas will be carried down Second street under high pressure and connected with a Franklin street main, now to be laid. The Franklin street line is to be 6-inch pipe. As soon as enough subscribers are ready to have their places piped the Chemung company's service gang will be here to do the work all at once. It is surmised that the Chemung County Gas Co., of which Mr. M. H. Arnot is president, is interested in this project. At any rate there seems to be some strong interest behind Mr. Reynolds' determined now to give Watkins all the natural gas she wants.

The Consumers' Natural Gas Co. has filed with the village clerk its bond for \$5,000 to indemnify the village against damages, as required by the company's franchise. When Watkins shall have, as it bids fair soon to have, natural gas ample and permanent volume, its thanks will be largely due to the initiative of our townsman, Mr. George G. Hill.

Upright, Brave and Gentle. This is President Roosevelt's idea of what young men should be. Under his photograph presented to the Blessed Sacrament Society of St. Jean Baptiste church in New York city, is the following in his own handwriting:

"For the Sentinels of the Blessed Sacrament: 'I wish you all success as a society in your efforts to make our young upright and brave and gentle, never flinching from the strong, never wronging the weak.' THEODORE ROOSEVELT."

The society is composed of forty-two young men selected upon the strictest moral and religious lines.

New and Valuable Potato. Rivaling the Irish potato in flavor, exceeding it in production and furnishing at the same time from its blossoms an exquisite perfume, a new white potato is being exploited in France. Thornwell Haynes, United States Consul at Rouen, has reported it to the State Department.

Mr. Haynes says that this wild aquatic vegetable was introduced from the banks of the River Mercedes, Uruguay, and distributed in France by Professor Heekel, director of the Colonial Institute of Versailles. In its original state the tuber is very bitter, but Dr. Heekel pronounced marvelous the results of four years of experiments with it.

In the same soil the yield is greatly superior to that of the ordinary potato. The Early Rose in one instance gave 8,000 pounds to the acre, the American Marvel 3,000 pounds, and this new species 8,500.

Trail of the House Fly. William L. Underwood, a lecturer in the Massachusetts Institute of Technology, has been following with microscope and photographic plate the trail of the house fly and his discoveries are startling not to say alarming. As they pass over food countless numbers of germs, too small to be seen save by the aid of a microscope, are planted. Twelve hours later, the dishes containing the food having been kept in a warm place, the groups of bacteria could easily be seen with the naked eye. During this time the germs had multiplied many thousands times. At each place where the fly's feet or tongue touched, a living colony, or, rather, a city of germs was found. The population of a single colony was counted and found to contain 40,000,000 germs. They had, of course, multiplied many times after they were planted on the jelly by the fly's tongue.

Scientists have before told us that the house fly carries with it no end of germs that may do the human being lots of harm, but forty-six million germs per fly track is a startling discovery. Prof. Underwood has created a new incentive for the use of the fly sparker, and the housewife will find herself in a new campaign against the great American household nuisance.

At Sugar Hill. There will be an ice-cream social Saturday evening, July 23d, at the home of J. L. Buck for the benefit of the Sugar Hill Presbyterian church. All are cordially invited.

A New Potato Pest. The cause for the blight which swept over the potato crop in this section a week ago has been successfully solved by J. W. Truax. Mr. Truax works the Conover farm and for days past witnessed the destruction of his thriving potato crop. The stalks and leaves began to wilt and Mr. Truax was at a loss to account for such an affection. After a careful examination of the stalks he discovered that small worms had concealed themselves on the inside of the stalk and were sapping away the life of the vine.

The pests make very rapid inroads and eat away the heart of the stalk causing it to wilt and topple over. The Leader would be glad to hear from any farmers who have met with a similar experience, especially if any one has discovered a remedy.—Cornell Leader.

Weather Notes for June. Highest temperature 85°; on 25th; lowest temperature 40°; on 12th; mean, 64.3°; normal, 62.6°; departure, 1.8° above; warmest days 5th and 26th, mean temperature 74°; coldest day 10th, mean temperature 55°; rainfall 3.39 inches; normal 4.90 inches; departure 1.51 below; greatest in 24 hours 1.39 inches, on 9th. There were 13 days with .01 inch or more rainfall, normal 16. There were 13 clear, 11 partly cloudy and 8 cloudy days; average 12, 13, 5. Sunshine 57.3 per cent, normal 60 per cent. Until Further Notice.

Expresses and Tribune Farmer. \$1 50
Expresses and Tri Weekly Tribune. 2 00
Expresses and W. Kly Democrat
and Chronicle. 1 75
Expresses and Tri Weekly World. 2 00
On receipt of price as above we will send the Express and other paper desired for one year to any address in this country. The Tribune Farmer is the best agricultural paper published, and its price will soon be advanced. The Tri-Weekly Tribune comes every other day, bringing all the world news, and is much more valuable and interesting than most dailies. The Rochester Weekly Democrat and Chronicle is a newspaper of high excellence, and contains much matter that is local to Western New York. The Tri-Weekly World is an entertaining newspaper, liked by many people, and is rather more on the sensational order than the Tribune, besides being Democratic in its politics.

Business Notices.
Prof. Bradley, optician, office on 10th st. 226241

Train No. 6 and connections land passengers in St. Louis 5:15 p. m. Through coaches from Lyons. Stop-off at Niagara Falls, returning, if desired.

A Reliable Man or Woman
is wanted to make a tabulation in this county for the Grand Jury and Subscription Co. We pay \$15 per week and commission. Pleasant employment. We prefer some one who has had experience in taking subscriptions. Write for full particulars. Address J. W. BURGESS, Mgr., Kendall, N. Y.

The Foolish Man
learns by experience. The average man learns by the experience of others. He is wise. He has money and learns by the experience of thousands of others who say that the new "EAST DRAFT LEAD PENS" are the ones to buy. Every one sold on a positive guarantee.

Sold by E. B. RUSSELL, Watkins.

Watkins Consolidated Gas and Electric Light Company.
Notice is hereby given that the election of directors for the Watkins Consolidated Gas and Electric Light Company not having been held on the day designated in the by-laws, a meeting of the members of said corporation for the purpose of electing directors thereof will be held at the principal office of the corporation in Watkins, Schuyler county, in the State of New York, on the 28th day of July, 1904, at 10 o'clock a. m.

ROBERT B. KIRK, Secretary.
Dated July 11, 1904.

New York Central Summer Excursion Rates.
During the summer and autumn the New York Central will sell excursion tickets at low rates to the lake, mountain and seaside resorts, including Niagara Falls, Thousand Islands, Adirondack Park, Catskill Mountains, White Mountains, Saratoga Springs, Lake George and Champlain, Old Orchard Beach, etc. Also to the Pacific Coast, Mexico and various points west. Information about rates and train schedules may be obtained upon application to ticket agents or the undersigned.

The New York Central's books of travel, known as "The Four-Track Series," contain maps, numerous illustrations and information descriptive of all the great resorts in America. Among the number are the following: No. 8 "America's Summer Resorts," No. 6 "The Adirondack Mountains," No. 9 "Two Days at Niagara Falls," No. 8 "Two to Fifteen Days Pleasure Tours," No. 10 "The Thousand Islands," No. 17 "The Summer Resorts," containing a list of over 8,000 hotels and boarding-houses, in all sections of the country, giving capacity of houses, rates, etc. A copy of any one of the above booklets will be sent upon receipt of a two-cent stamp by W. H. Northrop, Gen'l Agent, Williamsport, Pa.

PAINFUL RHEUMATISM CURED WITH URIC-O.
Many people here in Watkins owe their good health and even their life to URIC-O. People who supposed they were crippled for life are becoming cured with that merited preparation for Rheumatism.

URIC-O is not an expensive remedy. It is a liquid internal medicine, not a guaranteed catch medicine. Just a common sense blood cure for all forms of man's greatest foe—Rheumatism. If you have Rheumatism in any form go to Wagon's who will show you this preparation and tell you of its wonderful working in this place.

Druggist, W. S. WAGON, Watkins.

N. B.—URIC-O is manufactured by the Smith Drug Company, Baltimore, N. Y.
